SUMMARY

Computer Science graduate from Taibah University with hands-on experience in Full Stack Web Development. Skilled in building responsive, scalable web applications — from front-end design to back-end systems and database management. Strong understanding of software engineering principles, clean coding practices, and system analysis, with proven experience using modern frameworks and technologies.

Adept at solving complex problems and transforming ideas into impactful digital solutions that improve user experience and meet business goals. Passionate about continuous learning and contributing to innovative projects that drive digital transformation.

EXPERIENCE

Front-End Developer (Freelance) | Foundations of Prevention (FOP) Platform – 2025

- Developed the front end of a responsive company website using React, TypeScript, MUI, and React Router, implementing dynamic product layouts and category-based displays to enhance navigation and overall user engagement.

EDUCATION

Bachelor’s Degree in Computer Science - Taibah University

- Enrolled in the Computer Science Program (start date: 2020 - expected graduation date:2025)

CERTIFICATIONS & COURSES

Full Stack Web Developer – Satr · 2024

- Skilled in HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, Git, Bootstrap, DOM, and API development.

Web Application Development - Dorooob · 2024

- Comprehensive course on web app development with required assessments and modern browser practices.

Frontend Developer (React) – HackerRank · 2025

- Focused on React, CSS, and JavaScript, covering the development of interactive and responsive web applications.

Web Development for Beginners - Simplilearn SkillUp · 2025

- Learned the fundamentals of HTML, CSS, and JavaScript to build interactive web pages from scratch.

PROJECTS

2025 - 2024

- ProjexHub** | Developed a collaborative platform for students and supervisors to showcase and manage graduation projects. Built using React, TypeScript, HTML, and CSS, enabling real-time interaction and intuitive user experience.
- Generate Cards** | Designed and implemented a web app for creating and sharing digital business cards, using Next.js, React, TypeScript, Tailwind CSS, and Shadcn UI to deliver a modern and responsive interface.
- To-Do App (Full Stack)** | Built a task management web app connected to a PostgreSQL database using Node.js, Express.js, and JavaScript, providing CRUD functionality and responsive UI.
- Educational Platform – Programming Tutorials Aggregator** |Created a web platform that aggregates top YouTube programming tutorials to simplify learning. Developed with React, TypeScript, MUI, React Router, and Vite, ensuring smooth navigation and fast performance.

TECHNICAL SKILLS

- Programming Languages:** Python, Java, JavaScript, TypeScript
- Front-End:** HTML, CSS, React, Next.js, Vite, Tailwind CSS, MUI, Shadcn UI
- Back-End:** Node.js, Express.js, PostgreSQL
- Tools & Technologies:** Git & GitHub, RESTful APIs, API Integration, DOM Manipulation, Version Control, Responsive Design
- Core Competencies:** Web Development, Data Structures & Algorithms, Software Engineering Principles, Debugging & Problem-Solving

SKILLS

- Problem-Solving & Debugging
- Logical & Analytical Thinking
- Attention to Detail
- Adaptability & Flexibility
- Collaboration & Team Communication
- Time & Task Management
- Creativity in Coding Solutions
- Self-Learning & Research Skills
- Focus & Persistence
